an examination of why  
government agencies allow  
environmental injustices to  
persist many state and federal  
environmental agencies have  
put in place programs policies  
and practices to redress  
environmental injustices and

yet these efforts fall short of  
meeting the principles that  
environmental justice activists  
have fought for in from the  
inside out jill lindsey harrison  
offers an account of the  
bureaucratic culture that  
hinders regulatory agencies  
attempts to reduce  
environmental injustices it is  
now widely accepted that  
america s poorest communities  
communities of color and  
native american communities  
suffer disproportionate harm  
from environmental hazards  
with higher exposure to  
pollution and higher incidence  
of lead poisoning cancer  
asthma and other diseases  
linked to environmental ills and  
yet harrison reports some

regulatory staff view these problems as beyond their agencies area of concern requiring too many resources or see neutrality as demanding color blind administration drawing on more than 160 interviews with interviewees including 89 current or former agency staff members and more than 50 environmental justice activists and others who interact with regulatory agencies and more than 50 hours of participant observation of agency meetings both open and closed door harrison offers a unique account of how bureaucrats resist undermine and disparage environmental justice reform and how environmental justice

reformers within the agencies fight back by trying to change regulatory practice and culture from the inside out harrison argues that equity not just aggregated overall improvement should be a metric for evaluating environmental regulation *Torn from the Inside Out* 2004 emerging from darkness daring to take form and become something more than the other monsters stalk these pages shifting form in true monstrous fashion as they inhabit literature and film history and parallel communities modelled after our own they become enmeshed in popular music run rampant through cities take androgynous form to rally for

**Changing Business from the Inside Out** 2017-09-08 from out of a dark corner is a true story of the work i did in a halfway house for young people with major mental illness i organized a musical group there and met a man with a severe obsessive compulsive disorder o c d who had a beautiful voice and was living in the facility he had been in and out of state hospitals for

over twenty years taking medication which caused him to act very drugged he was erroneously diagnosed with schizophrenia from several psychiatrists over the years and was destined to live a terrible institutionalized life i had just graduated florida international university with a degree in psychology and applied whatever knowledge i had about mental illness in order to help him at the time i was married to another man but later divorced him because i fell in love with marty after reading dr leonard cammers book freedom from compulsion i diagnosed martys problem correctly and spent years helping him with his repetitive

rituals and excessive hand washing i was also able to help him relive his childhood with his mentally sick mother until he got much better i chose the title from out of a dark corner because marty spent day after day sitting in his bedroom in a corner not doing much of anything except attending the halfway house he also helped me to leave my dark corner because of the fear i had that i too would suffer psychotic episodes like my poor mother did today marty doesnt take any medication for o c d and lives a normal life socializing with my friends and singing professionally

**Thoughts from the Inside Out** 2010-11-30 corporate

responsibility is considered an oxymoron by much of society corporations are among the least trusted of our institutions and the 2008 financial crisis bp's oil spill in the gulf of mexico and the collapse of the house of cards that was enron have only added to public skepticism so at a time when trust in corporations has reached an all time low why is interest in corporate responsibility at an all time high a plausible explanation is that increasing numbers of stakeholders are demanding responsibility from corporations hyper transparency of corporate activities fueled by disclosure laws and the internet has increased awareness to the

point where corporate behavior is under constant scrutiny smart business leaders are aware of this scrutiny and of the high costs of a public scandal they know that in the long run it is cheaper to act responsibly now than to dig out from a pr disaster later tim mohin is a veteran corporate responsibility practitioner who has led programs at apple intel and amd in this book tim tells us why he believes he is making a difference where it counts and how others can do the same his book is a manual on how to steer the corporate supertanker toward doing good for people and our planet changing business from the inside out provides a

fascinating roadmap to the corporate responsibility and sustainability field from beginning a career to forming a program to navigating the complicated politics of a corporation mohin likens the corporate treehugger role to being the designated driver at the corporate cocktail party throughout his book he argues strongly that activists can accomplish more for the planet and society by serving as a voice of responsibility within the corporation rather than protesting outside the factory gates corporations are clearly the drivers of the world economy and the corporate responsibility practitioner has an essential role in bringing

ethical and sustainable values to the c suite and making sure that they are accomplished whether you are a practitioner needing advice a mid career professional wanting to change course or an mba wondering how to incorporate responsibility into your career this book has the answers you need
