2015-01-01 what is

life is nobel laureate erwin schrödinger's exploration of the question which lies at the heart of biology his essay mind and matter investigates what place consciousness occupies in the evolution of life and what part the state of development of the human mind plays in moral questions autobiographical sketches offers a fascinating fragmentary account of his life as a background to his scientific writings
Volume 3 - Diversity of Life 2015-01-01 authoritative thorough and engaging life the science of biology achieves an optimal balance of scholarship and

teachability never losing sight of either the science or the student the first introductory text to present biological concepts through the research that revealed them life covers the full range of topics with an integrated experimental focus that flows naturally from the narrative this approach helps to bring the drama of classic and cutting edge research to the classroom but always in the context of reinforcing core ideas and the innovative scientific thinking behind them students will experience biology not just as a litany of facts or a highlight reel of experiments but as

a rich coherent discipline
